To Whom It May Concern:

This is to certify that the below-mentioned is our authorized dealer for the range of ProCar electric buggies and transporter products for Vietnam.

Siamvinagolf Joint Stock Company
2, ally 14, Lane 104, Dao Tan,
Cong Vi Ward, Ba Dinh District,
Hanoi City, Vietnam

Siamvinagolf Joint Stock Company will undertake the responsibility for the after sale services and all related issues for our ProCar range of products.

Please do not hesitate to contact us should you need further clarifications. Thank you.

Yours truly,

A handwritten signature in black ink, consisting of a large, sweeping loop followed by a smaller, more intricate flourish.

Jimm Leong
Manager (Commercial)

ProCar

Golf Buggies

Electronically & Mechanically Controlled Braking System which includes EMB, also known as Auto Parking Brake System, Regenerative Braking and Mechanical Drum Brakes. Presence of 2 brake systems makes life easier and safer. **Standard feature in ProCar Elite Golf Buggy**

Overhead storage netting to store items such as mobile phones and other small items. Keep Things secure and yet, easily within reach

Front wire storage basket in stainless steel material to store items such as clipboards, mobile phones and other small items. Easily visible and within reach for Golfers.

LITHIUM

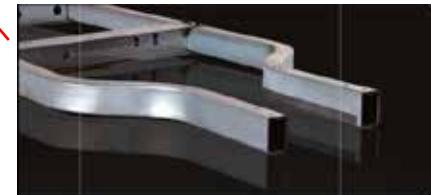

Lithium LiFePO4 Batteries to offer fast charging, weight savings, extended battery life **Optional Feature**

Front & Rear Coil Over Spring Suspension to offer superior handling when compared to leaf springs **Standard feature in ProCar Elite Golf Buggy**

14 standard colours or Custom Colour of Choice available to suit NCI Pte Ltd;s requirements. All we need is the Pantone Colour Code. **Standard option in ProCar Elite Golf Buggy**

High Strength Aluminium Chassis means that our clients will not need to deal with rust. **Standard feature in ProCar Elite Golf Buggy**

Golf Buggies

With Upgraded Storage Package

Summary of what's included in ProCar Golf Buggy (With Optional Accessories)

- 2 Seater Buggy
- Choice of 14 standard colours or **Custom colour** (Pantone colour code required)
- **Electro Magnetic Braking System** (Also Known as Auto Parking Brake System)
- Regenerative Braking (Buggy slows down when accelerator is released)
- Mechanical Drum Brakes
- Hill Descend Control (Maintains slow speed for hill descends)
- **350 Amps Curtis Controller** (Best for Hilly Terrain due to higher torque)
- **Italy Graziano 16:1 gear ratio** (Best for Hilly Terrain)
- **Coil over spring Front & Rear Suspension** (Better handling compared to leaf springs)
- **High Strength Aluminium Chassis** (No Rust)
- **Front mounted Stainless Steel Front Wire Basket** (Holds Phones, Walkie Talkies and other Small items)
- **USB Charger** (For charging mobile devices on the go)
- **Overhead Netting Storage**
- Golf Bag Cover

ProCar

Marshal Buggies

LED Flashing Beacon in Red and Green
To be mounted on canopy. Brighter than ordinary beacons and reduced electrical consumption

LED Display Board mounted on top of canopy to show a selection of custom messages such as "Course closed due to lightning activities". Messages are programmable. Controller mounted on dashboard for Marshal to select as appropriate. Provides better visibility to golfers. Easy to read at one glance. LED board will be weather-proofed for tropical climate and everyday use. **Optional Feature**

Front wire storage basket in stainless steel material to store items such as clipboards, mobile phones and other small items. Easy reach for Marshals. **Standard option in ProCar Elite Marshal Buggy**

Siren Plus Public Address System mounted flushed on dashboard for high decibel audible warning. Also has a PA system incorporated for easy communication with golfers in the course. **Optional Feature**

USB Charger Socket for mobile devices **Standard option in ProCar Elite Marshal Buggy**

Custom Colour of Choice to suit Tanah Merah Country Club requirements. All we need is the Pantone Colour Code. **Standard option in ProCar Elite Marshal Buggy**

First Aid Plus AED Customised Storage Box to be mounted above sweater basket. To fully equip Marshals with the AED and First Aid kit so that they can respond quickly to any emergencies on the course. Box top be built to suit dimension of existing AED and First Aid Kit. This storage box will also serve to protect the Marshals from ball strikes from the rear. **Optional Feature**

More on the **ProCar** Brake Systems

The ProCar Elite is equipped with 3 types of braking system. 2 to slow the buggy down to a complete stop while a 3rd to engage the parking brake automatically

1. Regenerative Brake System (Slows down Buggy to a stop) + Hill Descend Control

When accelerator pedal is release, the controller sends a signal to the motor to decelerate and which in turn will convert kinetic energy into a form which can be used immediately or stored for future use. The buggy is also programmed to maintain a slow speed when buggy is being driven down a slope. This ensures the golfers' safety at all times.

You are safer
in a ProCar!

More on the **ProCar** Brake Systems

2. Mechanical Drum Brake System (Used as an Auxiliary Brake system in ProCar Elite)

This is usually not in use as the regenerative braking will sufficiently slow the buggy down to a complete stop in most scenarios. The mechanical drum brake system only comes into use when the user depresses the Stop Pedal when the need arises for the buggy to come to a complete stop in less time it takes for the regenerative braking to stop the buggy (Emergency Brake). Its mechanical linkage will engage the brake shoes to expand and push against the brake drums, so as to stop the vehicle by using frictional forces.

3. Electro Magnetic Brake System (Auto Parking Brake System)

The EMB System is mated to the motor of the buggy. When the buggy comes to a complete stop (Through regenerative braking or mechanical braking), electrical currents will be cut off from the EM braking system. This causes the armature in the system to lose its magnetism and the springs to push the rotor against the hub, thus creating a holding force.

The **ProCar** Advantage

#1 Robust Construction & Reliable System

- Built in accordance to ISO9001 & CE standards.
- Robust construction to withstand the high demands of everyday use
- High quality US & European components

The

ProCar

Advantage

#2 Sustained Cost Savings

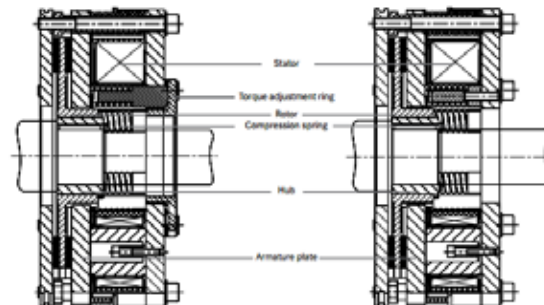

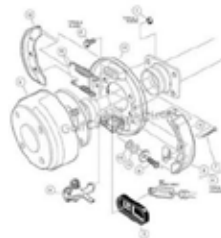

- ProCar Elite Golf Buggies are sensibly priced for **Immediate Cost Savings**
- Spare parts are also sensibly priced for **Sustained Cost Savings**
- Components are designed to be **individually replaced**
- Quality never compromised

The **ProCar** Advantage

#3 Both Electronically & Mechanically controlled Brakes For Added Safety

- Regenerative Brake System (Slows down Buggy to a stop when accelerator is released) with Hill Descend Control (Limits downhill speed)
- Mechanical Drum Brake System (Used as an Auxiliary Brake system in ProCar Elite.)
- Electro Magnetic Brake System (Auto Parking Brake)
- Most ideal for courses with Hilly Terrain.

The

ProCar

Advantage

#4 High Strength Aluminium Chassis

- Robust yet Corrosion Resistant
- Ideal for our Tropical Climate
- No need for rust treatment and repairs
- Lightweight. Less energy consumption

The

ProCar

Advantage

#5 High Quality Accessories

Ours: the ClubClean difference

- ▶ High grade polypropylene case and lid with a lifetime warranty
- ▶ Black ABS life like ball retainer handle.
- ▶ Low profile design – no bandaged knuckles
- ▶ Textured lid eliminates club scratching
- ▶ Neoprene gasket material (also used for wetsuits, very durable)
- ▶ Patented flow through a single chamber, simple and quick draining
- ▶ Custom made polypropylene brushes for better memory

Theirs: compare and contrast

- ▶ short 2 year warranty.
- ▶ ball retainer handle looks like a wiffleball.
- ▶ very slow draining, not good for a 100 car fleet
- ▶ brushes are nylon, made in a broom factory
- ▶ higher profile design which scratches easily

The **ProCar** Advantage

#6 Built in USB Charger for your devices

- Charges mobile devices while playing golf!

The

ProCar

Advantage

#7 Loads of Storage Spaces

- Front mounted Stainless Steel Wire Basket
- Overhead Nylon Netting Zipper Storage
- Rear Sweater Basket with cover
- Glove Compartment at Dashboard

The **ProCar** Advantage

Going for Lithium? Great! Save \$\$\$\$!

With Lithium batteries, you will be saving money on:

- At least one cycle of change of Wet Cell Batteries worth an estimated \$150,000 SGD for 100 units of buggies as Lithium batteries are meant to last above 5 years
- Charging cost as Lithium batteries charges in half the time it takes wet cell batteries to charge

The

Advantage

Experienced & Reliable After Sales Service Team

- 39 years of experience in electric buggies and turf machinery
- Factory trained technicians
- Reliable After-Sales Service

The

Advantage

Strategic Parts Inventory Management

- Well Stocked Parts Inventory
- Same Day Delivery for Fast Moving Spare Parts
- Express Delivery for Indented parts
- Most ProCar Mechanical Components are manufactured by Factory and not from out sourced vendors

The

Advantage

Our Experience & Reputation

- ATS Reputation built over a span of more than 39 years
- Most experienced in the industry
- Passionate, Professional & Committed Team
- Looking forward to be of Service to NCI Golf Pte Ltd

ProCar

- Manufactured by Dongguan Excellence Golf & Sightseeing Car Co Ltd in Guangdong, China
- ATS – Excar Partnership since 2014
- Built to ATS's specifications
- ATS visits Excar factory on a quarterly basis
- ProCar buggies are manufactured to the highest International Standards

ProCar
